    - Next time: Order button works, call from local database.
  - Jon
    - Last time: Discover page leads to business page and it shows services from business. Service also shows information
    - Next time: API working for business page, making the page dynamic
- Everyone:
  - Make the UI better
    - Pictured background throughout
  - Error and success should not show json messages, it should be an actual page
- Cloudinary
  - External api for uploading images. Takes uploaded image and gives url and we can just save url to our database
